

**Updated March 3, 2020**

Multi-Purpose CAA has need for contractors to complete work on eligible homes that may be weatherized through Department of Energy or LIHEAP Weatherization funding. See below for necessary information regarding becoming a contractor on our Approved Contractor List.

**Weatherization Contractors Needed:**

Multi-Purpose Community Action Agency seeks contractors to perform Energy System Repairs or Replacements and/or Weatherization work. The agency seeks general contractors as well as HVAC Licensed Contractors. Specific training certifications will be required to be on the Approved Contractor List.

Required Training for all Contractors/Sub-Contractors Training and Certification Requirements for Sub-Contractors (HVAC, Electrical, Plumbing and General Weatherization) This list should not be considered exhaustive of all requirements, but a generalized version of some of the requirements.

Contractors performing general weatherization work (and their employees) must attend comprehensive training for their job duties, i.e. installer staff must attend Retrofit Installer Technician training, crew leaders must attend Crew Leader training, etc.

Intro to WX online course (Mold & Moisture, Asbestos Awareness, KY WX Field Guide)

Lead Safe Work Practices (required for crew members)

Certified Lead Renovator (RRP) (required for Crew Leaders, Quality Control Inspectors, and Dwelling Needs Evaluators)

Lead Safe Firm certification

CPR certification

General First Aid certification

Technicians (Service Provider Staff or Sub-Contractors): All technicians are required to be licensed in their respective discipline (HVAC, Electrical, etc.) Technicians shall maintain their professional licenses in accordance with KRS 227A.010-150 for electric, KRS 198B.650-689 for HVAC, and meet all requirements regarding fees and continuing education.

Certificates of Insurance for General Liability and Comprehensive Coverage for general contractors performing work must meet the minimum coverage requirements in the amount of \$800,000 or greater if annual contractual requirements change.

HVAC contractors must have minimum Certificates of Insurance in the amount of \$500,000.00 general liability and \$300,000 property damage or greater.

Work is awarded through a bidding process. Questions regarding this advertisement may be directed to Marsha Fenwick at 502.633.7162 or e-mailed to [marsha@mpcaa.org](mailto:marsha@mpcaa.org).
